## (54) TELETEXT RECEIVER

## (57)Abstract:

PURPOSE: To prepare a program table by taking information on a teletext television program presented by a plurality of broadcasting stations.

CONSTITUTION: A television signal received by an antenna 10 is supplied to a channel selection part 11, divided into video and character signals. The character signal is processed by a character signal processing part 14 to be written in a display memory 16. In this case, program information is written in a program memory 15. This processing is performed on all channels. A program table is prepared in a program table display part 17 to be displayed on a picture tube 13.
